

TradeBoard

TradeBoard

4Links web based procurement tools use real time data and innovative design to create a dynamic trading platform, enabling a shift from historic to predictive buying.

Suppliers post best prices for your commonly purchased commodities & products, you buy in real time to exploit market volatility or over supply.

TradeBoard services a new bred of web savvy buyers who want live data & the flexibility to spot buy or form aggregations to drive \$m's of savings. It takes a different approach, but the result is instant profit growth.

Tradeboard's the next generation buyer's tool, for buyers who know their requirements and what commodities or products they can spot buy for the right price

TradeBoard is dynamic, Suppliers are connected as bidders and this sets the board in motion. As bids are posted, history is tracked and buyers are alerted to opportunities as supplier's push out special deals or run outs.

TradeBoard operates 24/7. A single click streams new products and price data benchmarked to your market in real time.
